

Subject: Renal hypertension

Case study

A 62-year-old retired teacher was diagnosed with renal hypertension following years of poorly controlled high blood pressure and gradual decline in kidney function. Despite a regimen of antihypertensive medications and dietary restrictions, she experienced persistent headaches, fatigue, and swelling in her lower legs. Looking for complementary options to support her well-being, she began bioresonance therapy sessions alongside her conventional treatment plan.

Energetic testing with bioresonance devices identified disturbances in her energy fields, highlighting areas of cellular imbalance. Sessions were tailored to restore overall energy balance and foster healing at the cellular level. Over the course of several weeks, the patient reported reduced headache frequency, improved energy, and a better sense of general wellness. While her blood pressure medications remained unchanged, she noted an improvement in her vitality and sleep quality, suggesting enhanced overall well-being from the integrated, cause-oriented approach. The therapy focused on harmonizing her body's cell frequencies—a gentle way to support her journey towards health.

Bioresonance treatment program:

39.65 Renal hypertension.....	Time
00.00 Analysis preparation	5 min
01.00 Vitalisation complete	5 min
02.00 Acupuncture Meridians complete	5 min
31.39 ATP production blood vessels.....	5 min
35.10 Raising the defence capacity, basic program.....	5 min
70.47 Vasodepression	10 min
38.00 Circulatory system physiology complete	5 min
39.50 Blood pressure regulatory disorder	5 min
39.65 Renal hypertension	5 min

64.60 Kidney.....	5 min
31.50 Basic detoxification program	5 min
01.00 Vitalisation complete	5 min
