

## Subject: Pleuritis sicca / exsudativa

### Case study

A 67-year-old retired teacher presented with sharp chest pain and shallow breathing. Diagnosed with pleuritis exsudativa, she experienced persistent discomfort despite standard anti-inflammatory therapy and rest. Medical imaging confirmed inflamed and thickened pleura, but her symptoms lingered, making even mild exertion difficult.

Seeking complementary support, she began bioresonance therapy to address suspected energetic imbalances. Initial assessment identified disturbances in her energetic fields and indicated a strong energetic burden around her lungs. Weekly sessions used frequency adjustments to harmonize her cell energy, focusing on both symptom relief and overall vitality. Over several weeks, she noticed improved comfort, reduced pain, and greater ease of movement. While bioresonance did not replace her prescribed medications, she reported enhanced well-being and improved life quality, suggesting that harmonizing her energy supported her recovery process alongside traditional care.

### Bioresonance treatment program:

<b>43.40 Pleuritis sicca / exsudativa</b>	<b>Time</b>
00.00 Analysis preparation.....	5 min
01.00 Vitalisation complete .....	5 min
02.00 Acupuncture Meridians complete .....	5 min
31.11 ATP production lung .....	5 min
35.10 Raising the defence capacity, basic program.....	5 min
70.17 Lung system .....	10 min
43.40 Pleuritis sicca / exsudativa .....	5 min
42.81 Pulmonary pleura (pleura visceralis) .....	5 min
42.82 Costal pleura (pleura parietalis).....	5 min
31.50 Basic detoxification program .....	5 min

01.00 Vitalisation complete .....5 min
