

# Subject: Pyelonephritis (pyelitis and kidney infection)

## Case study

A 58-year-old woman presented with acute pyelonephritis characterized by high fever, flank pain, and urinary discomfort. Her medical history included type 2 diabetes and hypertension, and she had experienced recurrent urinary tract infections over the past year. Conventional therapy with antibiotics led to partial improvement, but she continued to experience fatigue, episodes of low-grade fever, and a sense of persistent malaise.

Open to supporting her recovery, she sought bioresonance therapy. Initial energetic testing indicated an energy disturbance at the kidney and urinary tract meridians. Her treatment plan focused on harmonizing cell frequencies—an approach aimed at restoring overall energy balance while complementing her traditional medication. Over several sessions, she reported improved energy, fewer urinary symptoms, and a renewed sense of well-being. While bioresonance was not a substitute for antibiotics, it was used to foster healing at the cellular level and reinforce her body's natural recovery processes.

## Bioresonance treatment program:

<b>45.30 Pyelonephritis (pyelitis and kidney infection)</b>	<b>Time</b>
00.00 Analysis preparation	5 min
01.00 Vitalisation complete	5 min
02.00 Acupuncture Meridians complete	5 min
31.23 ATP production kidney	5 min
35.10 Raising the defence capacity, basic program	5 min
70.21 Kidneys, ureter	10 min
44.10 Kidney complete	5 min
44.11 Renal pelvis	5 min

44.20 Urinary organs complete.....	5 min
45.30 Pyelonephritis (pyelitis and kidney infection).....	5 min
31.50 Basic detoxification program .....	5 min
01.00 Vitalisation complete .....	5 min
