

Subject: Cystitis (inflammation of the bladder)

Case study

A 47-year-old woman experienced recurring cystitis for over two years, despite multiple rounds of antibiotics prescribed by her physician. While the medications reduced acute flare-ups, lingering pelvic discomfort, frequent urination, and fatigue persisted. Eager to find a more holistic approach, she visited a bioresonance practitioner for complementary support.

During her initial assessment, bioresonance analysis indicated an energetic imbalance in the bladder and urinary tract. According to the practitioner, "Get an assessment of your body's energy fields with Bioresonance analysis" helps in identifying the energetic disturbances underlying physical symptoms. The treatment plan involved a series of sessions tailored to restore overall energy balance within her pelvic region, alongside continued medical supervision. Over several sessions, she reported gradual relief, especially in urinary discomfort and general energy levels. While she continued conventional medications as required, bioresonance therapy supported her overall well-being and symptom management without adding side effects.

Bioresonance treatment program:

45.35 Cystitis (inflammation of the bladder)	Time
00.00 Analysis preparation	5 min
01.00 Vitalisation complete	5 min
02.00 Acupuncture Meridians complete	5 min
31.17 ATP production bladder	5 min
31.23 ATP production kidney	5 min
35.10 Raising the defence capacity, basic program	5 min
70.21 Kidneys, ureter	10 min
44.10 Kidney complete	5 min
44.20 Urinary organs complete	5 min

45.35 Cystitis (inflammation of the bladder)	5 min
45.40 Urethritis (inflammation of the urethra)	5 min
31.50 Basic detoxification program	5 min
01.00 Vitalisation complete	5 min
