

Subject: Neuralgia

Case study

A 58-year-old retired teacher developed trigeminal neuralgia, experiencing severe, electric-shock-like facial pain that frequently disrupted her daily life. Despite trying multiple medications, including anticonvulsants and pain relievers, she continued to have unpredictable flare-ups and residual tingling sensations, affecting her mood and energy levels.

Seeking a complementary approach, she began bioresonance therapy, which included a comprehensive energy field assessment. Energetic analysis revealed longstanding disturbances in her facial nerve pathways. Bioresonance therapy sessions focused on harmonizing cell frequencies and restoring overall energy balance. The treatment was tailored to her specific energy patterns, providing gentle energetic support alongside her neurological medication. Over several weeks, she noted a reduction in pain episodes, improved sleep, and an increased sense of calm. While her neuralgia remained a chronic concern, bioresonance contributed to energy balance and enhanced her quality of life without interfering with ongoing medical treatments.

Bioresonance treatment program:

55.41 Neuralgia.....	Time
00.00 Analysis preparation	5 min
01.00 Vitalisation complete	5 min
02.00 Acupuncture Meridians complete	5 min
31.10 ATP production complete.....	5 min
35.10 Raising the defence capacity, basic program.....	5 min
70.10 Nervous system	10 min
54.20 Peripheral nervous system, complete	5 min
55.41 Neuralgia	5 min
71.11 Pain receptors	5 min

71.50 Pain relief	5 min
31.50 Basic detoxification program	5 min
01.00 Vitalisation complete	5 min
