

Subject: Dry macular degeneration – Dry AMD

Case study

A 74-year-old retired teacher with a history of hypertension and gradual vision changes was diagnosed with dry age-related macular degeneration (AMD). She reported increasing difficulty with reading and recognizing faces over the last two years. Previously managed with dietary changes and antioxidant supplements as advised by her ophthalmologist, her vision continued to decline, affecting her daily life. Seeking additional support, she decided to try bioresonance therapy alongside her conventional care.

During energetic testing, mild energy deficit and disturbances were noted in the ocular meridian points. Her personalized bioresonance plan aimed to harmonize cell frequencies in the retina, promote optimal cellular energy balance, and provide energetic support to improve quality of life. Over several weekly sessions, she experienced subjective improvements in eye comfort and reduced visual fatigue during daily tasks. While no claims of restored vision were made, the patient and her care team appreciated the complementary role of bioresonance in promoting overall well-being and maintaining a positive outlook.

Bioresonance treatment program:

57.41 Dry macular degeneration – Dry AMD	Time
00.00 Analysis preparation.....	5 min
01.00 Vitalisation complete	5 min
02.00 Acupuncture Meridians complete	5 min
31.31 ATP production eyes	5 min
35.10 Raising the defence capacity, basic program.....	5 min
70.12 Eye system	10 min
38.10 Arteries	5 min
39.10 Arterial impairment of the blood supply.....	5 min
54.22 Cerebral nerve (optic nerve)	5 min
56.34 Retina	5 min

56.61 Visual nerve.....	5 min
56.62 Yellow spot.....	5 min
57.41 Dry macular degeneration – Dry AMD	5 min
31.50 Basic detoxification program	5 min
01.00 Vitalisation complete	5 min
