

Subject: Tinnitus

Case study

A 52-year-old accountant experienced ongoing tinnitus for over three years, described as a persistent ringing in both ears. Initial assessments by ENT specialists found no structural problems, and trials of hearing aids and magnesium supplements provided minimal benefit. The tinnitus was exacerbated by stress and fatigue, impacting his sleep and concentration.

Seeking alternative support, he visited an integrative clinic offering bioresonance therapy. An initial energetic assessment focused on the frequencies associated with his auditory system, revealing possible energy disturbances. Therapy sessions aimed to harmonize cell frequencies—a safer option to restore well-being—while complementing ongoing medical advice. Over several weeks, the client reported a reduction in noise intensity and improved ability to rest, with less daytime distraction. Although tinnitus did not disappear, the combination of energy balancing and conventional care helped enhance his quality of life, foster healing at the cellular level, and support overall well-being.

Bioresonance treatment program:

59.10 Tinnitus	Time
00.00 Analysis preparation.....	5 min
01.00 Vitalisation complete	5 min
02.00 Acupuncture Meridians complete	5 min
31.10 ATP production complete.....	5 min
35.10 Raising the defence capacity, basic program.....	5 min
70.15 Acoustic organ, organ of equilibrium	10 min
38.10 Arteries	5 min
39.10 Arterial impairment of the blood supply.....	5 min
58.30 Middle ear complete	5 min
58.40 Inner ear complete.....	5 min

59.10 Tinnitus	5 min
59.40 Acute hearing loss	5 min
72.00 Psyche	5 min
75.00 Stress	5 min
31.50 Basic detoxification program	5 min
01.00 Vitalisation complete	5 min
