

## Subject: Otitis media, acute (acute ear)

### Case study

A seven-year-old boy was brought to clinic by his parents with complaints of acute ear pain, fever, and hearing difficulty. He had a history of recurrent otitis media and had recently completed a course of antibiotics with some improvement, though symptoms recurred. Energetic testing using bioresonance analysis indicated an energy disturbance in the middle ear region and subtle imbalances in his cellular frequencies, supporting the likelihood of ongoing inflammation and energetic deficit.

Sessions of bioresonance therapy were initiated with the goal to harmonize energetic balance and foster healing at the cellular level. The treatment plan was designed to support the body's natural processes and was complemented by ongoing conventional follow-up with his pediatrician. The boy attended weekly sessions, and after four treatments, his ear discomfort significantly decreased, and he showed improved overall well-being. His family noted improved sleep and energy levels. Bioresonance provided energetic support, complementing traditional therapy without side effects or undue burden, focusing on restoring energy balance and immune resilience.

### Bioresonance treatment program:

<b>59.21 Otitis media, acute (acute ear)</b>	<b>Time</b>
00.00 Analysis preparation	5 min
01.00 Vitalisation complete	5 min
02.00 Acupuncture Meridians complete	5 min
31.25 ATP production lymph	5 min
35.10 Raising the defence capacity, basic program	5 min
70.15 Acoustic organ, organ of equilibrium	10 min
36.00 Lymphatic system physiology complete	5 min
38.10 Arteries	5 min
58.30 Middle ear complete	5 min

59.21 Otitis media, acute (acute ear) .....	5 min
31.50 Basic detoxification program .....	5 min
01.00 Vitalisation complete .....	5 min
